BESPOKE

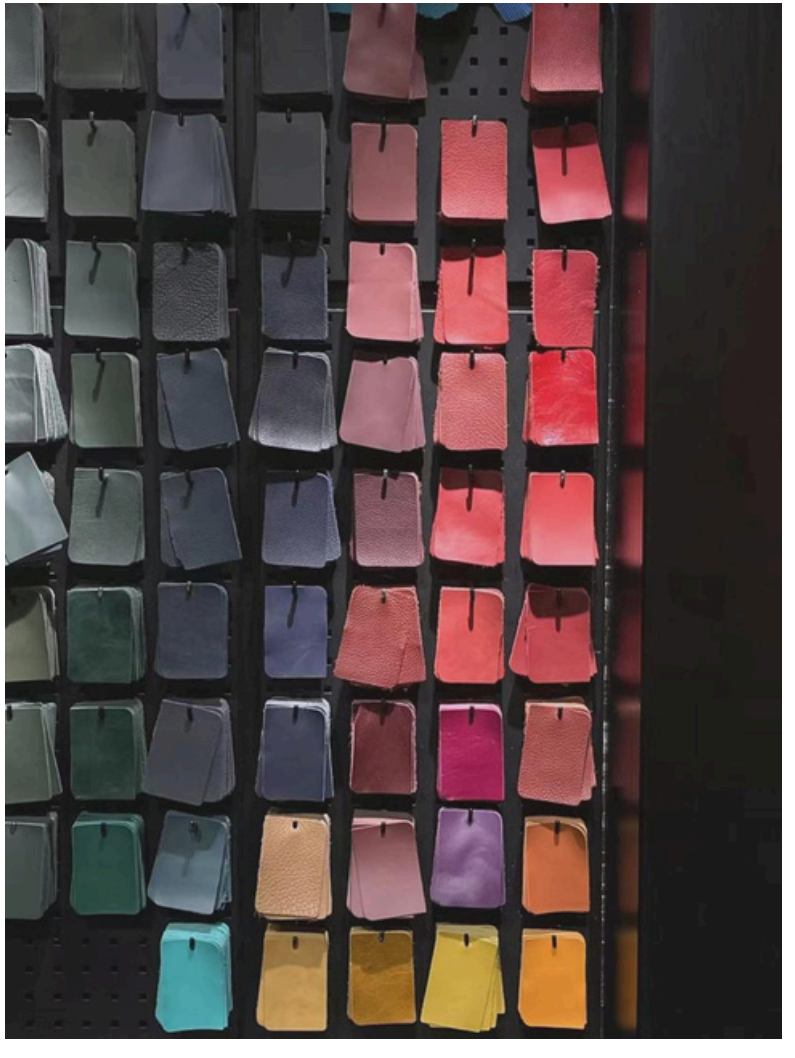

LAYOUT DESIGN& CUSTOM DIMENSIONS

Fromoverall floor planoptimizationtomillimeter-precise module width - including armrests, seat cushions, and central consoles - we tailor both spatial layout and individual dimensions to achieve flawless balance in your room.

MODULAR CONFIGURATIONS

UPHOLSTERYOPTIONS

From the timeless elegance of supple top-grain leather to the rich, inviting warmth of textured fabrics, our upholstery palette allows you to tailor every seat to your personal sense of comfort.

To explore our comprehensive collection of color swatches, please contact us to request the digital catalog.

BESPOKEEMBROIDERY

True luxury speaks through the details. Custom embroidery turns your seating intoan exclusive statement of identity—whether rendering a family crest, personal initials, or a bespoke motif. Through high-density stitching and premium metallic threads, we translate your unique vision into a lasting symbol of distinction.

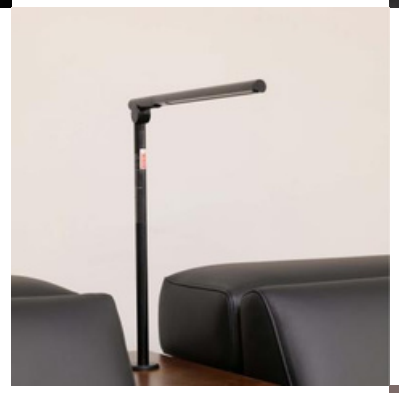

Beyond seating design, our bespoke service integrates smart utility into every detail.

From wireless charging pads and precision reading lights to custom swivel tables, every feature is engineered to place ultimate convenience right within reach.

NEXT-DIMENSION BESPOKE

4D Haptic Integration

3D is what you see. 4D is what you see and feel —with motions like pitch, roll, and heave bringing the action to your body.

How a 4D Seating Works?

The 4D seating brings movies to life by combining sight, sound, and motion.

A source device (Apple TV, Blu-ray Player) plays the movie, while the Movie Sync Box captures its audio and communicates with the 4D Motion Server via the internet.

The Server stores pre-programmed motion commands and sends the corresponding commands back to the Movie Sync Box, which then relays them to the Control Hub.

The hub activates the actuators (legs) to performpitch, roll, and heave movements.
